 - Choice of symbol only, English (shown) or Bilingual (EN/FR)

Tagg Clean-Hands® 2-shelf Wall Sanitizing Station (Continued)

Model: SSW-16-A

Facility Cost Savings:

- Quick release significantly reduces labour involved in the regular repainting of walls. No cutting-in required around station – simply remove
- Significantly reduces cleaning labour versus traditional, flimsy plastic drip catches that often go missing
- Prevents damage to walls & floors, reducing repair costs
- Allows dispensers to be removed and replaced without damaging walls, reducing labour & material costs

Visit www.taggcleanhands.com to see our full line of Tagg Clean-Hands® Sanitizing Stations. All our products are proudly made in Canada. Built-to-order; branding options available.

Facility and Salary Savings of Tagg Clean-Hands® Compact Wall Station

- All estimates are based on a large facility with 5,300 dispensers
- Wages are at \$28/hr for facility staff and \$22/hr for cleaning staff
- Dispenser change-overs are performed every 3 or 5 years, as shown
- Wall painting estimated at once every 7 years
- Cleaning is daily as per mandated PIDAC standards

Dispenser Changeover Costs (Wall Repairs)

	<i>3-year</i>	<i>5-year</i>
Number of change-overs over 30-year facility life:	10.00	6.00
Maintenance labour cost total:	\$742,000.00	\$445,200.00
Labour plus material:	\$1,484,000.00	\$890,400.00 ^A

Wall Painting Costs (Every 7 years)

	<i>30 years</i>
"Cutting in" around existing dispensers:	\$52,558.33 ^{B1}
Painting costs with our stations:	\$1,051.17
Savings:	\$51,507.17 ^{B2}

Cleaning Costs (Daily Dispenser-related costs)

	<i>30 years</i>	<i>1 year</i>
Cleaning Costs (10s each):	\$3,546,583.33	\$118,219.44 ^{C1}
Cleaning costs with our stations (2.5s each):	\$886,645.83	\$29,554.86
Savings:	\$2,659,937.50	\$88,664.58 ^{C2}

Formulae:

A: [(Hourly Wages) x (Time Per Repair)] + (Material Costs per Repair) x (Dispenser Count) x (Time Frame)

B1: (Painting Time) x (Wages) x (Dispenser Count) x (30-year time frame) ÷ (4.25)

B2: Difference between B1, and B1 with est. 98% improvement in labour time as a result of use of Tagg products

C1: (Cleaning Time) x (Wages) x (Dispenser Count) x (Time Frame)

C2: Difference between C1, and C1 with est. 75% improvement in labour time as a result of use of Tagg products

The Infection Control Symbol Package

A “No Smoking” symbol is effective at communicating behavior change to all, and with these we’ve brought that power to the field of infection prevention and control.

This package contains our complete set of infection prevention and control symbols licensed for free, noncommercial use such as on websites to educate travelers.

They are designed to be a common language for public health and are released under a Creative Commons license in order to increase awareness, reduce barriers to implementation and ultimately be available where needed to save lives.

The world needs to speak the same language when it comes to infection control.

To date, this package has been downloaded in over 90 countries.

Can't think of what to put in the station message areas?

Download our free Communication Templates: pre-designed Microsoft Word documents using our symbols.

Get them at www.taggcleanhands.com/downloads

Need custom infection prevention signage?

As we hold the rights to our symbols, we can adapt them to produce just about any kind of sign you need, including labels or print material. Get in touch!
